## IODINE-BASED TEAT DIP

# HV-PROTECT

IODINE-BASED TEAT DIP

The HV-PROTECT is a thick antiseptic teat dip containing 1% iodine for use after milking dairy cows. This solution is applied using a dip cup. The protective film creates a highly effective barrier against infections.

## AVANTAGES :

- Highly visible
- No waste
- Easy to clean
- Above 8% glycerin
- Addition of lanoline in the formula to promote teat repair
- WITHOUT Nonylphenol\* : Substance used by the industry that causes fertility issues in cows and humans

## PRODUCT FORMATS :

- 20L
- 55L
- 200L
- 1040L

## DIN :

02440954
