**INFORMATION SATISFACTORY LETTER (ISL) for Max-V
Drug Identification Number (DIN) 02455765**

Dear Mr. Chamberland:

The information and material received in support of the DIN submission for Max-V has been reviewed.

The information and the label, version "30/05/2016", are considered to be satisfactory. The DIN for Max-V is 02455765. The Drug Notification Form (DNF) is enclosed.

It is the responsibility of the DIN owner to ensure that the labelling material used for their products is in full compliance with all the regulatory requirements.

Any post-approval labelling changes may need to be submitted to the VDD as a Change to DIN, for review and authorization. Please contact the Veterinary Drugs Directorate (VDD) for guidance.

In addition, note that all Canadian drug establishments must hold an establishment license to fabricate, package, label, distribute, import, wholesale, or test a drug. For additional information, contact the Drug Establishment Licensing Unit at the Regulatory Operations and Regions Branch by telephone at 613-618-4529, by email at: DEL_questions_LEPPP@hc-sc.gc.ca or by visiting the Health Canada website.

Yours sincerely,

Mary Jane Ireland, MSc, DVM, MBA
Director
Clinical Evaluation Division
