MAX-V

TEAT DIP AFTER MILKING

The MAX-V is a very thick, antiseptic teat dip based on chlorhexidine. This solution is applied using a dipping cup. The protective film creates a very effective barrier against infections, making it ideal for cows grazing in the summer.

ADVANTAGES :

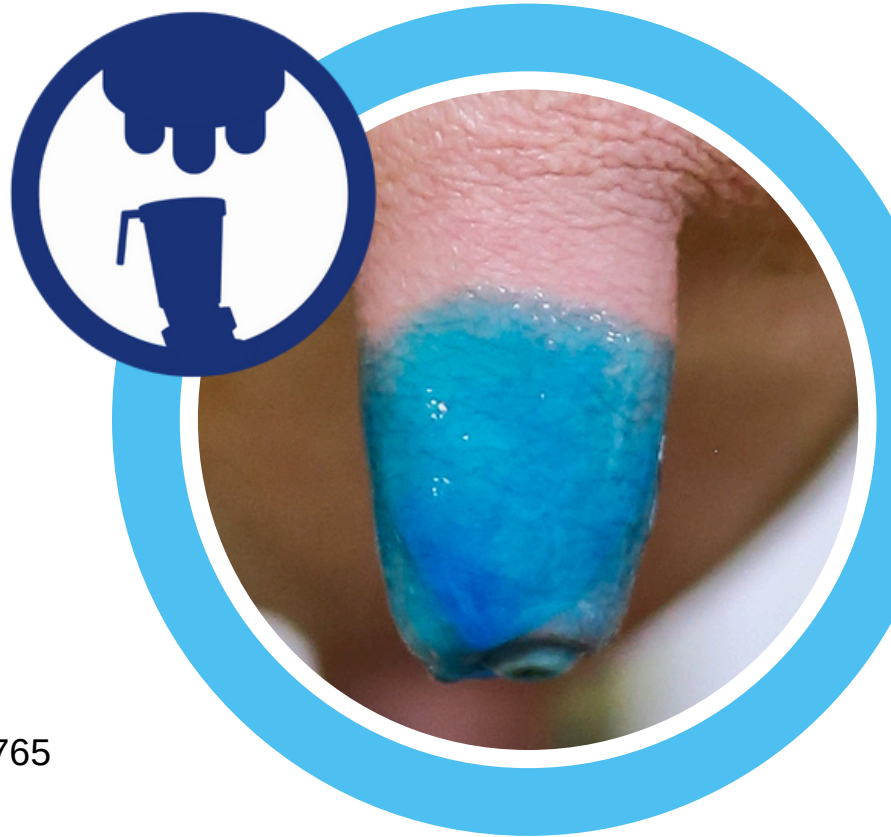

- Highly visible, blue
- Protective film
- Easy to clean
- Above 10 % glycerin
- Added lanoline in the formula to promote teat repair

PRODUCT SIZES

- 20L
- 55L
- 200L
- 1040L

DIN :

02455765
